Dr. R. [REDACTED]
[REDACTED]

RE: [REDACTED]
DATE OF BIRTH: MARCH 6, 1967
CLINIC VISIT: JANUARY 13, 2005

Dear Dr. R. [REDACTED]

Mr. [REDACTED] returned to my office for follow-up. He had some moderate sleep apnea, which was dependant on a supine body position. He went on a drastic diet with Dr. P. Poon and has lost 27 pounds. He is now 167 pounds he is 5'11" tall. The snoring has decreased. He sleeps 7 hours and wakes up feeling refreshed. There is no excessive daytime somnolence. I am wondering if he still has sleep apnea with his recent weight loss. I shall be seeing him in my office with a repeat sleep study.

Thank-you very much for involving me in his care.

Sincerely,

Dr. V [REDACTED]

c.c. Dr. P. Poon
